*Designing vacuum instruments and scientific controllers for over 30 years*

## WHAT MAKES US DIFFERENT:

- Integrating Multiple Elements
- Scientific Instrument Manufacturing
- Useful Innovation
- Product Lifecycle Engineering
- Predictive Lead Times
- Made in America

## OBJECTIVE:

To design and build vacuum instrumentation and scientific controls that you can rely on.

## OUR VALUE:

DigiVac serves OEM, reseller and end user customers who are trying to solve tough R&D, process and manufacturing challenges with scientific controllers and vacuum instrumentation. Our engineering philosophy is to refine our controllers to be reliable, intuitive and efficient. We back our designs with smart and responsive technical support. For over 30 years, the continuous improvements of our engineering designs and manufacturing process have delivered profits for our customers and solid growth for DigiVac. We build and maintain lasting relationships with our customers that are the result of being a consistent, helpful and creative vendor.

## INDUSTRIES SERVED:

- R&D
- Industrial
- Manufacturing
- Power
- Scientific
- Cryogenic
- Government
- Marine
- Medical
- Pharmaceutical
- HVAC
- Semiconductor

## CUSTOMER SUCCESS EXAMPLES:

- Bayard-Alpert ion gauge improvements and manufacturing
- Convection active gauge design and manufacture
- Handheld Vacuum Analyzer with Bluetooth app
- Motor speed controller and UI for homogenizer
- Freeze dryer controls with desktop software
- Medical aspiration control
- Fluorometer optical enzyme based pathogen detection
